PRODUCT DETAILS

Custom cellular shades are some of our most sought-after window treatments due to their versatility, functionality, and contemporary style. Our cellular window and door shades have a unique honeycomb design that makes them insulating and highly energy efficient. The cells prevent air from entering or escaping through windows thus keeping your home's internal temperature more consistent. Along with a large color selection, we offer several options to customize your indoor cellular shades to your personal needs such as cordless, top-down bottom-up, motorized, two-on-one and day/night.

CARE & CLEANING

To maintain the fine quality look of the shade, occasionally vacuum the surface or wipe with a damp sponge containing a very mild solution of soap and warm water.
